---

## SUMMARY

Detail-oriented Software Test Engineer with 3+ years of experience in Manual and Automation Testing, specializing in UI and API automation using Cypress and Playwright. Proven expertise in designing scalable automation frameworks using Page Object Model (POM), improving test coverage, and enhancing software quality. Experienced in Agile/Scrum environments, collaborating with cross-functional teams to deliver high-quality enterprise applications.

## PROFESSIONAL EXPERIENCE

### Test Professional - QA

Jan '25 - Dec '25

*Siemens Technologies, Pune*

Pune, IN

- Designed and implemented scalable Cypress automation frameworks using Page Object Model (POM), improving test coverage and maintainability
- Automated UI and API test cases, reducing manual testing effort and accelerating regression cycles
- Integrated automated test suites with Jenkins CI/CD pipelines for scheduled execution and reporting
- Collaborated with developers and product owners to identify defects early and improve product stability
- Executed regression and system integration testing to ensure seamless module interaction
- Participated in Agile ceremonies including sprint planning, stand-ups, and retrospectives
- Analyzed test results, reported defects in Jira, and tracked them to closure

### Software Engineer- QA

Aug '22 - Oct '24

*Unisys Private Limited*

Hyd, IN

- Built and maintained Cypress-based automation frameworks for UI and API testing
- Developed and executed end-to-end test cases including functional, regression, and integration testing
- Performed API testing using Postman and validated backend services
- Contributed to test planning, test case design, execution, and defect tracking using Jira
- Conducted peer reviews for test cases and automation scripts to ensure quality standards
- Worked closely with cross-functional teams in Agile environments to deliver reliable software

## PROJECTS

### Train Planning System (Hacon)

Jan '25 - Dec '25

*Siemens Company*

Pune, IN

A software solution developed to manage and optimize train scheduling, resource allocation, and operations within a rail network. It helps improve train punctuality, reduce delays, and ensure efficient use of railway resources through real-time monitoring, conflict detection, and data-driven planning.

### PCS Revenue Systems (Patron Control System)

Aug '22 - Oct '24

*Unisys Company*

Hyd, IN

PCS Revenue Control Systems is a leader in school food and nutrition technology providing a complete and fully integrated line of products and services. From prepayments on the web to free and reduced application processing, meal accountability, claims reporting, menu nutrition analysis, food purchases and inventory control we strive for the highest degree of customer satisfaction, providing project management, training, webinars, and continuing maintenance, upgrades, and support

TECHNICAL SKILLS

- **Operating Systems:** Windows 11
- **Languages:** JavaScript, Typescript
- **Automation & Testing Tools:** Cypress, Playwright, Jenkins
- **Bug Tracking & Project Management:** Jira
- **Version Control:** Git, GitHub, Gitlab
- **Development Tools:** VS Code, GitHub Copilot
- **Communication & Collaboration:** Slack, Microsoft Teams, Outlook.
- **Productivity & AI Tools:** ChatGPT, MS Office
- **Domain Knowledge:** Social media domain, Business, Railway domain
- **Frameworks:** Page Object Model (POM)

CERTIFICATIONS/TRAINING

- Successfully completed training of GitHub Copilot.
- Successfully completed training of Automation Testing ( Cypress )
- Learn Manual Software Testing with Live Project + Jira Tool - Udemy

KEY SKILLS

Cypress Components & Automation.  
Manual & Automation Testing.  
Functional & Compatibility Testing.  
Page Object Modelling.  
Systems, Integration & Regression Testing.  
Automation Framework.  
UI Automation.  
API using Postman.  
Desktop Application Testing
